Senior Mobile Engineer with 7 years of experience in building high-quality iOS, Android, and Flutter applications. Specialized in Clean Architecture, CI/CD automation, mobile security, and scalable feature development. Recognized for strong ownership, reliability, cross-team collaboration, and the ability to deliver complex solutions in fast-paced environments across Canada and Europe.

Technical Skills

Languages: Kotlin, Swift, Dart (Flutter), Java, XML

Frameworks: Jetpack Compose, SwiftUI, UIKit, Flutter, Bloc, GetIt

Databases: Firebase, MongoDB, SQL Server, SQLite

CI/CD: Fastlane, GitHub Actions, Bitrise, Codemagic

Testing: JUnit, XCTest, Flutter Test

Tools: Git, GitHub, GitLab, Maven, CocoaPods

Architectures: Clean Architecture, MVVM, MVC

Operating Systems: macOS, Ubuntu, Windows

Professional Experience

Senior Android Developer — Desjardins — Montreal, Canada

2023 – 2025

Worked on the AccèsD and Caisse Scolaire mobile applications.

- Developed new security and fraud prevention features for millions of users
- Improved biometric authentication flows and secure notification pipelines
- Designed and developed the *Dreams* module for Caisse Scolaire

Stack: Kotlin, Jetpack Compose, XML, SwiftUI, MVVM, Jira, Firebase, GitLab, Azure

Lead Flutter Developer — Groupe3MC — Montreal, Canada

2022 – 2023

Technical lead for a consumer-facing service platform.

- Designed application architecture and multi-stage environments (dev/staging/prod)
- Implemented CI/CD pipelines using Fastlane and GitHub Actions
- Mentored junior developers (Flutter, Bloc, Clean Architecture)
- Integrated Google Vision image recognition
- Automated translation workflows using Python scripts

Stack: Flutter, Bloc, GetIt, Firebase, GitHub, Fastlane

iOS & Android Developer — TotalEnergies — Paris, France

2020 – 2021

Worked on the MyCard mobile application (fleet management).

- Added electric charging features to the MyCard application
- Contributed to UI/UX redesign and Kotlin Multiplatform (KMM) integration
- Participated in backend logic via Kotlin Multiplatform
- Worked in an Agile SAFe environment with pair programming and code reviews

Stack: Kotlin, Swift, KMM, MVVM, Firebase, Jetpack Compose

iOS & Android Developer — Nomad Education — Paris, France

2019 – 2020

Worked on France's leading educational mobile application.

- Developed AI-based recommendation features

- Implemented video modules, parent profiles, and social features
- Maintained CI/CD pipelines using Fastlane and backend compatibility
- Conducted testing, debugging, and collaborative code reviews

Stack: Kotlin, Java, Swift, Firebase, MVC, MVP

iOS & Android Developer — SpotMyCity — Paris, France

2017 – 2019

Developed a social networking mobile application.

- Built authentication, chat, messaging, and user review features
- Integrated geolocation, NodeJS APIs, and MongoDB database
- Deployed beta versions via Firebase and TestFlight

Stack: Java, Kotlin, Swift, Objective-C, MVVM, CocoaPods

Freelance Projects

Waaa — Travel Social Network (Flutter)

2021 – 2022

Travel-oriented social application (available on app stores).

- Implemented authentication via AWS Cognito, Facebook, and Google
- Developed messaging, friends, events, and notification systems
- Managed CI/CD pipelines for TestFlight and Firebase Distribution

Stack: Flutter, Clean Architecture, BloC, GetIt, AWS

StartHome — Property Inspection Platform (Flutter)

2024 – 2025

Professional application for generating detailed property inspection reports.

- Designed a modular MVP architecture using RxDart for reactivity
- Implemented offline-first dynamic forms and high-resolution photo capture
- Built real-time synchronization pipelines via Laravel backend (API + PDF)
- Added authentication flows, role-based permissions, cloud storage, and caching strategies
- Improved engineering workflows through CI/CD, multi-environment setup, and release management

Stack: Flutter, RxDart, MVP, GetX, Laravel, Firebase

Hoopers — Basketball Courts & Events App (Flutter)

In progress

Mobile platform to list basketball courts and organize community tournaments.

- Designed user journeys: court discovery, match scheduling, events
- Developed a modern modular Flutter architecture
- Built community features: rankings, tournaments, teams, notifications
- Integrated location services and map-based interfaces

Stack: Flutter, BloC, GetIt, Firebase

Education

Master's Degree — Software Architecture & Application Development

ETNA — Paris, France

Bachelor's Degree — Computer Science

Université Paris 8 — France

Languages

French: Native

English: Fluent
